# History

- Boobries is a Demon God, First spotted in the 19th century with several other "bizarre" beasts. It is a generally a malevolent entity wreaking havoc upon its victims, with the ability to materialise in the form of various mythical creatures. It commonly preys on animals being transported on ships and will also happily eat lambs and sheep, carrying its prey away to the deepest water before consuming it near Boobrie island.

# What's Generation one ?

## Intro

Generation one of the Boobrie collection also called genosis is the first release of 1000 Boobries and will be a 2D art version of Boobries, This will kick start a large community seeking to be a voter in the community.

## Genosis benefits

Owning a Genosis 2D Boobrie will grant access to raffles, staking, giveaways, "Infinity projects", airdrops, private rooms, privately hosted games, x1 VIP token for land raffle and more to be announced post mint.

## Understand the World

Boobries has a strict no paper hands policy, generating funds internally through our token without the need for royalties in the future. So we have implemented a strategy from a fellow god and we will charge 33.3% fee for under the floor selling.

# Generation Two

## *Intro*

Generation two is our second collection of 3D individually created pieces, these have exclusive benefits.

## *Benefits*

Unlike Genosis, generation 2 will be able to vote with a little more control giving access to gen 2 voting.

## *Culture*

We are the gods that impact the market, we aim to follow our Degod friends to the top with a 33.3% fee when selling below the floor, Being human isn't easy after all...

## *Individuals*

Holders of both generation one and two are rewarded uniquely through our various features implemented into both the NFT and Token so hold onto your human pants.

# Rarity

The Boobries genosis NFT collection consists of 1000 unique characters that have acquired different features, these are distributed at random upon minting.

As Genosis is our first release, we will be benefitting the early investors equally with long term passive income rewards.

# *Infinity projects*

We have a great project there's no doubt, but to compete these days we need to blow your human minds with our tokenomics and infinity projects. When you invest in the infinity you are investing in a variety of community selected start-ups inside the infinity that you can see an increasing APY over time outside of the crypto space in REAL WORLD.

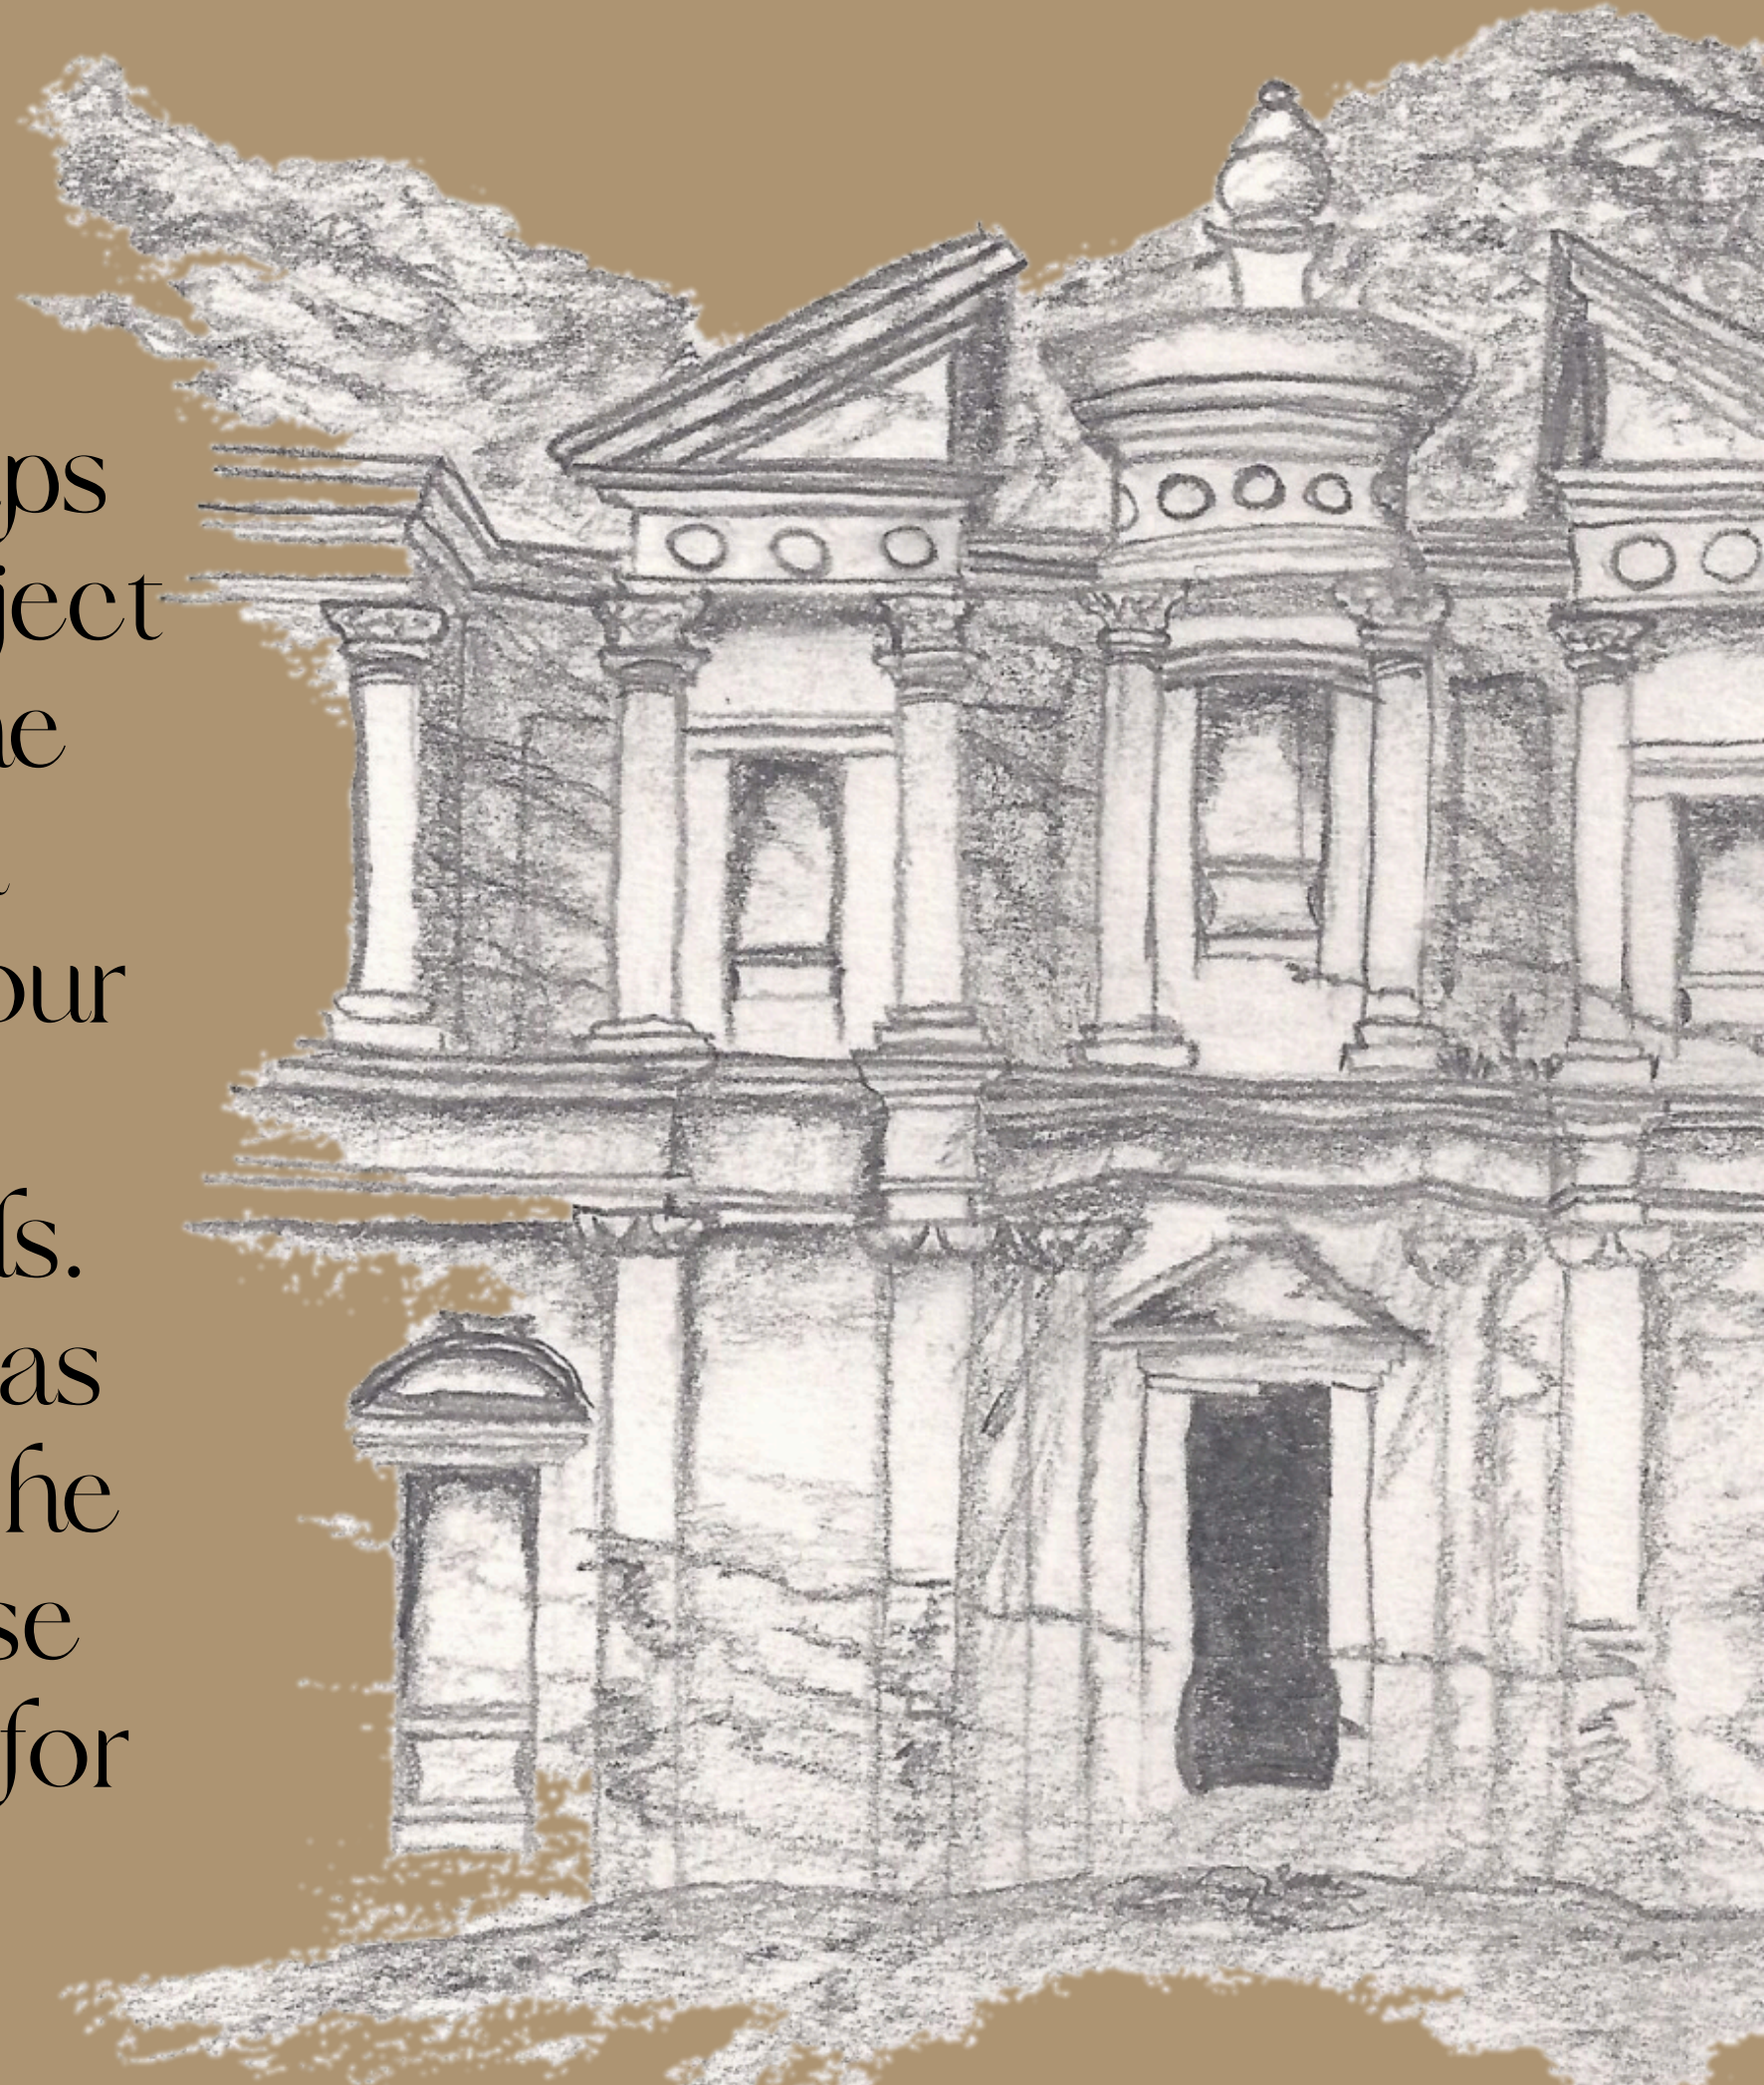

let me explain...

# *Gods dream Too..*

Infinity projects aims to fund start-ups inside our own community. these project can be hosted both exclusively in the Infinity or outside. When owning a boobrie you will be eligible to have your dream funded through the infinity treasury controlled by you....the gods. Gods can propose their business ideas for submission and when accpeted, the community can choose to fund these start-ups to generate more revenue for the gods.

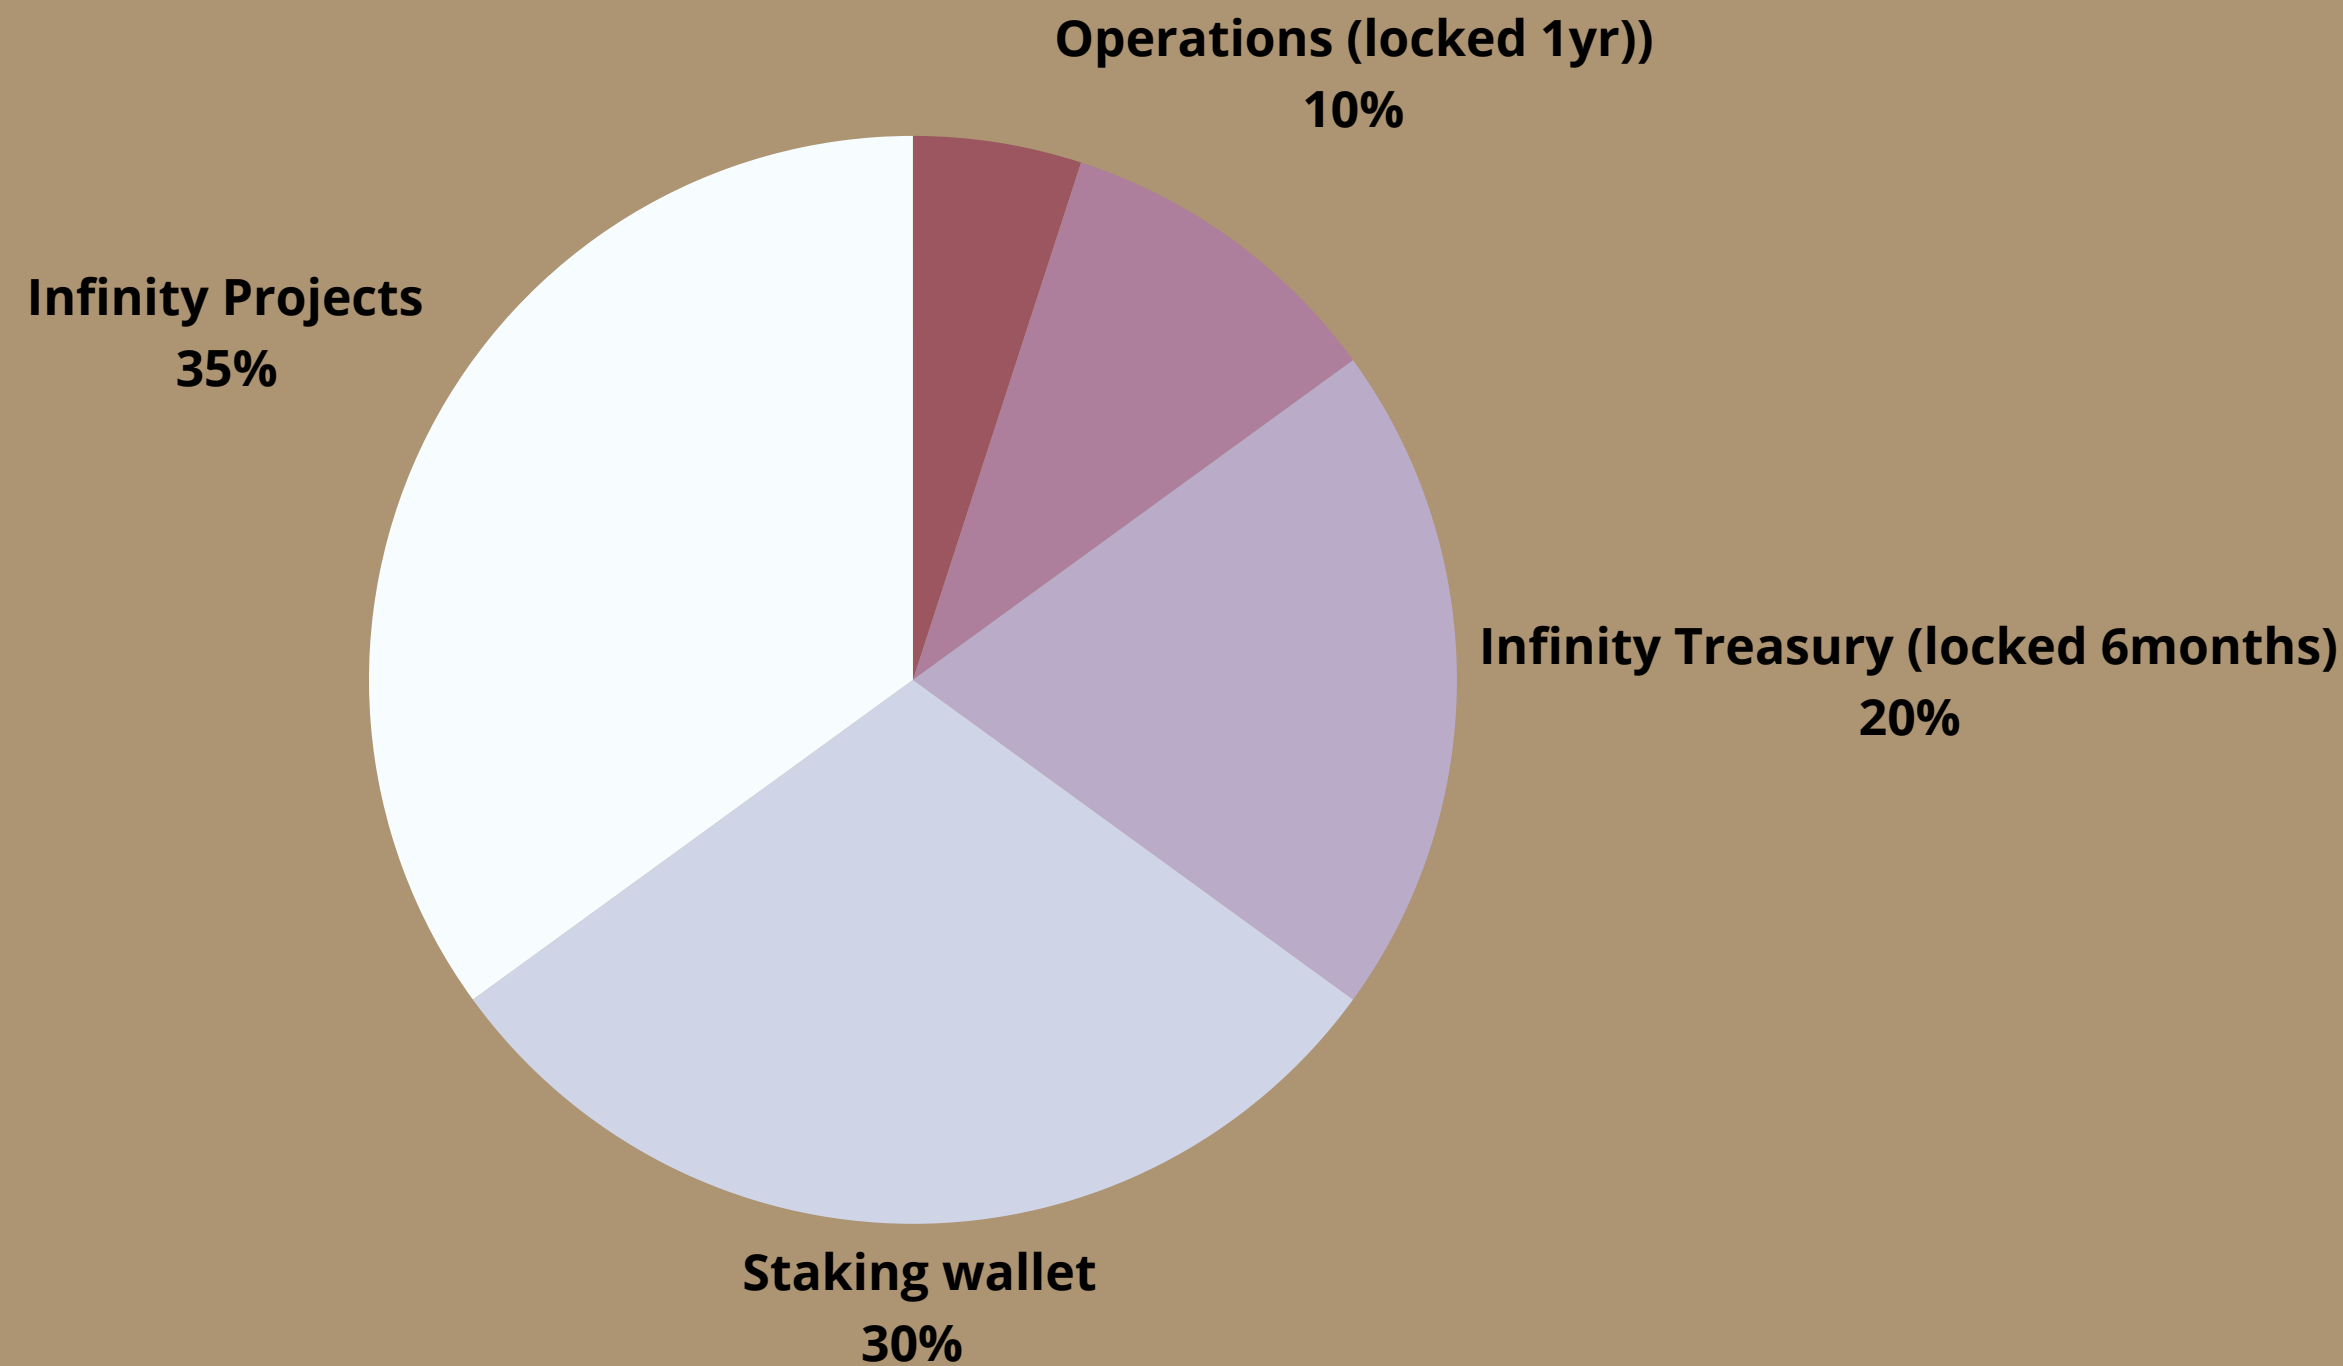

# *When infinity?*

Infinity projects is a long term plan, first the staking must come to it's natural end to have a new beginning that will be the infinity projects. We aim to have projects funded and generating income for our holders withing 4-5 years. Meanwhile passive income will come from the game and other short term features implemented to ensure the success and growth of the infinity and maintain a stream of passive income and entertainment for our GODS.

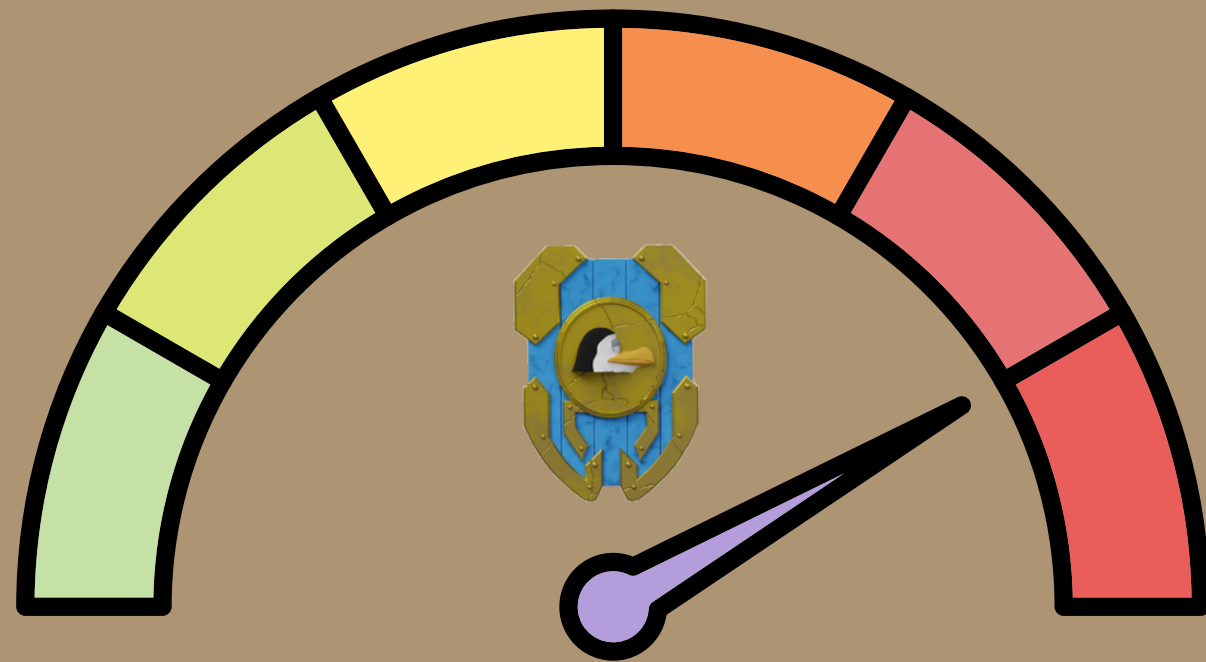

# Tokenomics

Boobries token supply will be aprox 10 million. Our token is deflationary meaning the price over time will not only remain stable but increase in value.

# *yearly APY for infinity?*

When an NFT is bought the diamond hand meter begins to increase towards the end of each year. When an NFT is sold the meter restarts, This percentage is distributed between holders that have not sold in the year period. This is also the case for the APY lost on every NFT sold, The extra APY goes directly back to the diamond hands.

# *Why become a Boobie god?*

We believe we can produce an amazing project for our holders both new and old, following in the foot steps of other successful projects implementing some well thought out tokenomics to ensure growth and revenue from the token, the nft and the game for our gods.

Moving forward into the future for sustainable growth we aim to be on top by using infinity projects as a great way to store value by spreading it into start-ups and co-existing in the space and growing our business value internally and externally. Becoming a share holder in hundreds of projects in the future giving "whale" a while new meaning.

What are you waiting for, become a the gods today...
